The SAMHSA National Guidelines for BH Crisis Care include **Zero Suicide/Suicide Safer Care** as a Core Principle, including evidence-based direct treatment for suicide risk.

The Zero Suicide Institute identifies three evidence-based direct treatments for suicide risk. Which of the following is **NOT** one of them?

A: Dialectical Behavior Therapy (DBT)

B: CAMS-Care (Collaborative Approach)

C: Standard Outpatient Mental Health Treatment

D: Cognitive Therapy for Suicidal Patients
