Officer, **Exodus  
Recovery**

In 1966, Accidental Death and Disability described the components of a modern emergency medical system (*first aid, 911, ambulances and accessible hospital EDs*) that would save countless lives.

What example did the authors use to suggest the US could do far better to respond to those injured in accidents or with medical emergencies?

**A:** Earthquake Disaster Response

**B:** Grady Hospital, Atlanta, Georgia

**C:** London's Cholera Epidemic

**D:** Battle-front Vietnam

**“Excellence of initial first aid, efficiency of transportation, and energetic treatment of military casualties have proved to be major factors in the progressive decrease in death rates of battle casualties reaching medical facilities [across four wars]”**
