DATA CORNER

[Talk.CrisisNow.com/LearningCommunity](https://www.talkcrisisnow.com/learningcommunity)
988 and Core Crisis Continuum

Nursing Data of Interest

- Nursing consistently rated as the most trusted healthcare professional
- Only 4% of licensed RNs work in psychiatric-mental health
 - APNA 2022 Workforce Report
- 39 states identified RNs as a discipline with a BH workforce shortage
- 11 states identified the RN shortage at a catastrophic level
- 37 states identified Nurse Practitioners as a discipline with a BH workforce shortage
- 6 states identified the Nurse Practitioner shortage at a catastrophic level
- In crisis receiving and stabilization facilities, specifically, 17 states identified RN and Nurse Practitioner shortages at the catastrophic level
 - NRI State Profiles 2024

Nursing Data of Interest

- 57% of sites surveyed about their most significant pain point or challenge in planning and since the implementation of Crisis Stabilization Centers identified staffing of qualified and licensed staff, staffing 24/7 centers, and team cohesion across agencies as the #1 challenge.
 - Policy Research Associates Insights from a Survey of Crisis Stabilization Centers
- Psychiatric Mental Health RNs – 62% of survey respondents practiced in hospitals. This is higher than in a national sample of RNs, which was at 55%
- Psychiatric Mental Health Nurse Practitioners – 70% of survey respondents practiced in outpatient settings (clinics, FQHC, health centers, and community-based programs).
 - APNA 2022 Workforce Report

Nursing Data of Interest

- Nursing survey results and considerations
 - UNMC Lincoln Senior Nursing Student Project 2022
 - APNA 2022 Workforce Report
